A JOURNEY IN CONSCIOUSNESS

ABOUT US

ILLUMINARI is the privilege and the process that potentially illuminates the deepest parts of ourselves. It is what it essentially means — being awake. (Are you ILLUMINARI?) An urban zen audiovisual collective from Singapore that travelled halfway across the world to see who they really are. As this spiritual phase comes to a close, a truer sound is being born from their journey as new producers. Aiming as much to inspire movement as to be moving, drawing always upon esoterica while choosing the loving relevant. From their roots in the underground hip hop scene where the vocalists met so long ago to their immersion in the stirring sounds of Southeast Asia, all influences now connect to weave a beautiful story of rhythm, spirit and love.
